

Chairman's Message

Dear Parents,

An educational institute plays a significant role in developing the moral, social, ethical and human values among the young learners. It also helps in broadening the mental horizon of the students who are the backbone of our nation's future. We lay focus on quality education and make sincere efforts to assure that education is not limited to curriculum alone. Hidden potential of the students is identified and encouraged for scholastic achievements. We equip children with smart, specific measurable, achievable, realistic and time bound goals and aim at providing holistic education and assets for the nation. It is our constant endeavours to spur the students on the path of independent thinking and chisel the personality with reined strokes of better attention.

To develop academic excellence, the school offers such an environment guidance and curriculum which enable the student's mental as well as social growth and make them achieve self independence and self-confidence. The ideals of quality and excellence, with emphasis on ethical as well as human values, commitment, discipline, progressive and international look with a secular nature.

Er. Parmjit Singh
Chairman

Vice Chairperson's Message

The magnificent outlook of the school transports the children into a wonderland of their fantasy. Innovative teaching techniques and well-equipped environment of the school including media projectors are being used to develop the mental abilities of young learners. The traditional classrooms are transformed into “Smart Class” system. Group activities in the school inculcate in the students team spirit, feeling of patriotism and teach them values of sharing and caring.

Our institution provides such an environment and curriculum to the students that they are able to face the variety of challenges in the present competitive world. They not only become self independent but also the ideal citizens who work hard to make their parents, teachers and their nation proud.

The dedicated team of teachers at school will leave no stone unturned to fulfil your expectation, as in fulfilling your expectation gives us all. We want your love, your faith and good wishes.

Aravindar Kaur

Vice Chairperson

Managing Director's Message

Believe it or not but it is a fact that the "seed" of education is already there within every child. What a child has to become it is already there encoded in his DNA. We as parents and teachers have to identify and recognize that code/trait/ talent and provide a favourable environment to ensure the manifestation/expression of that trait of the child. Let us not be the barriers or blockers as most of teachers and parents and education system do. 'Be Careful'. They are stars let them shine by themselves. Do not show them 'candle light'. Do not make their life easy. Let them have 'dreams' and soar high to touch celestial heights.

Let them face adversity. Adversity makes them strong. It is well said, "When struggle goes tough in life, it is the tougher who wins". Even the winds and cyclones turn in their favour, when they are consistent and persistent in their endeavour, with iron determination. Who so ever 'fights' achieves the goal. 'Where there is will there is a way'. God helps those who help themselves. Victory does not come to idlers who ignore the importance of struggle and opportunities. For victory strong urge, desire, dream, will power and ability to endure dire stress is indispensable.

In the end I would like to say that those children who attend classes seriously and study regularly need not to attend 'tuition' and coaching classes and burn 'mid night oil' during examination. They remain relaxed and surely achieve success. I offer sure guarantee of their success.

Let them imbibe and practise the habit of doing their own work, doing regular exercise, reading good literature and enjoy the company of good ones, to use leisure time in productive of work of their interest. Let them follow great 'leader' and 'heroes' as their model. I myself am the 'seed-product' of this prestigious alma-mater of mine and have now matured into a resplendent "tree". I have 'imported' some new ideas which we are going to incorporate here to augment our system on more firm footing.

We are trying our level best to provide an environment, full of challenges which is conducive for the holistic development of our children, so that they may grow into fully mature, strong and brave sons of India to lay strong foundation for the future of our country. We seek your full co-operation in this sincere effort so that they may touch celestial heights.

Er. Prabhjit Singh
Managing Director (MD)

Director's Message

We at SGGSPS strive to give our students the best education tailored to suit the needs of each individual student. We are equally concerned with the expectation of each and every parent who wants their child to perform to the best of their ability. Seamless co-ordination between the teacher, student and parents enables us to enhance the efficacy of the learning process.

We believe in giving our students an education which instills in them good values, clarity for what they want to achieve in future, deep introspection and a better understanding of self. Sports and extra curricular activities are given equal importance. We have seen our talented students bringing back huge laurels to the school by winning championships at all levels.

Amandeep Kaur

Director

Principal's Message

Dear Parents and Students

Nature is beautiful and bountiful. Mother Nature has blessed us and all other living beings not only with all things that are needed for their survival but also a system that runs the biosphere and universe in a just perfect order, nothing less nothing more. Besides this all human beings have been blessed with a DNA carrying our personality traits and potential/talent in a coded language. All human being have potential in equal measures. All are equally talented. However it entirely depends upon the individual to what extent and in which field one exploits that potential/talent. To tap that talent/potential to fullest extent one has to be consistent and persistent in efforts. Greater is the effort greater will be the success and achievement. Nothing is easy and nobody offers you on a platter. Have positive approach. Never let your past failures to cling/grip your mind. Start afresh with hope, commitment, patience, grit and determination. There is no shortcut route to success. Success is never phenomenal. Exceptional performance is required for phenomenal success. Slow and steady wins the race. No idea works until you translate that idea into action. Hurdles and practical problems will surely stand in your way but they are signals to warn you to follow the right track.

Commitment, discipline, patience and hard work are the pillars of success.

Now in the end I would like to say that Education is the kindling of flame and self education is the real and everlasting one on which edifice of success can be built. Where there is will there is a way. Whosoever seeks shall find.

Aspire Act and Achieve is our motto

We are at your service on first call. Never feel shy to meet us.

With regards

Shikha Walia

Principal
